PREFACE

California Prisoners and Parolees, 1990, is a presentation of statistical data about felons, civil narcotic addicts and other populations under the jurisdiction of the California Department of Corrections (CDC). Statistical data on felons in CDC have been published since 1950 when the first issue of *California Prisoners*, covering the years 1945 through 1949, was released. Statistical data on civil narcotic addicts have been published since 1967 when the first issue of *Summary Statistics, Civil Commitment Program for Narcotic Addicts*, covering the years 1961 through 1966, was published. Beginning in 1981, the two were combined into one publication.

This publication is organized into eight chapters and a Data Section that contain information on the different types of populations under CDC jurisdiction. Within each chapter summary data are illustrated through descriptive text, charts and graphs that record trends and provide comparisons of the constantly changing CDC population. More indepth information for each chapter is provided in tables that are located in the Data Section. These tables are referenced throughout the text as the source for the charts and graphs. The last section of the book is the Reference Guide. The Reference Guide provides a list of prisons by name and location; maps that identify the counties and the areas of commitment and parole regions; a glossary of terms and acronyms used throughout the publication; and a list of statute numbers for the offense categories.

The Director of Corrections administered twenty institutions, four parole regions and thirty-eight camps during 1990. The types of commitments received by CDC are Felons, Civil Narcotic Addicts, County Diagnostic Cases (under Penal Code Section 1203.03), some Youth Authority commitments, federal prisoners and prisoners from other states. This publication contains only a portion of the data available in report format. If you have a request for additional data or have any questions regarding the presentation of these data, please call (916) 327-3262 or ATSS 457-3262.

BEHAVIOR OF INMATES IN CDC INSTITUTIONS**TIME CREDITS LOST**

Information presented is based on the average credit losses for violations of the Department of Corrections Director's Rules specifying conduct.

- The average number of days lost per felon (based on the average daily population) in 1990 was 23.7 (this average is based on both inmates who lost credits and inmates who did not lose credits).
- The average number of days lost decreased from 26.1 days in 1989 to 23.7 in 1990.
- The large increase of the average from 1982 to 1983 was partly due to an increase in the maximum penalty for violations of the Directors rules, from 45 days to 180 days. This change coincided with the implementation of the Inmate Work Training Incentive Program (IWTIP), which enabled eligible inmates to earn more credits toward reduction of the time to serve than could be earned before for good behavior.
